INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR §1.56

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Submitted herewith on Form PTO/SB/08 is a listing of documents known to Applicant in order to comply with Applicant's duty of disclosure pursuant to 37 CFR §1.56.

A copy of each non-U.S. patent document is being submitted to comply with the provisions of 37 CFR §1.97 and §1.98.

The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicant does not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a *prima facie* art reference against the claims of the present application.

TIMING OF THE DISCLOSURE

The listed documents are being submitted in compliance with 37 CFR §1.97(b), before the mailing date of the first Office Action on the merits, and within three (3) months of the mailing date of a foreign office action.

CONCISE EXPLANATION OF RELEVANCE

The documents listed on the attached PTO/SB/08 were cited as being relevant during the prosecution of the corresponding Japanese application. A partial English translation of the Japanese Office Action of August 16, 2005, follows:

Cited Literature 1 and 2 describe how a base station determines the allowable wired network transport capacity (transport speed) based on the effective transport speed between a wireless terminal and the base station (corresponding to “wireless link state information” in the present invention), and instructs mobile exchanges and packet control nodes on the wired network to transmit data at the determined allowable transport capacity (transport speed) (see Cited Literature 1, Abstract, paragraphs 0030 through 0032, etc., and Cited Literature 2, Abstract, etc.). Employing the well-known ATM network as the wired network in the invention described in Cited Literature 1 and 2, thereby arriving at the arrangement of the inventions according to Claims 1, 4, and 7 of the present application, is a matter which could be easily accomplished by a person skilled in the art.

List of Cited Literature

1. Japanese Unexamined Patent Application Publication 2001-358763
2. Japanese Unexamined Patent Application Publication 2002-171572

Applicant's statements regarding the Japanese Office Action are based on a partial translation that Applicant's representative obtained. These statements should in no way be considered as an agreement by Applicant with, or an admission of, what is asserted in the Japanese Office Action.

Corresponding U.S. patents/publications and English language abstracts are provided.

Applicant respectfully requests that each listed document be considered by the Examiner and be made of record in the present

application and that an initialed copy of Form PTO/SB/08 be returned in accordance with MPEP §609.

STATEMENT

The undersigned hereby states in accordance with 37 CFR §1.704(d) that each item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart application and that this communication was not received by any individual designated in 37 CFR §1.56(c) more than thirty days prior to the filing of the information disclosure statement.

The Commissioner is hereby authorized to charge any additional fees which may be required regarding this application under 37 CFR §§ 1.16-1.17, or credit any overpayment, to Deposit Account No. 19-0741. Should no proper payment be enclosed herewith, as by a check being in the wrong amount, unsigned, post-dated, otherwise improper or informal or even entirely missing, the Commissioner is authorized to charge the unpaid amount to Deposit Account No. 19-0741.

Respectfully submitted,
